

pdfify-md sample

This file is rendered straight through `pdfify-md`, the CLI and TypeScript library that turns Markdown — including Mermaid diagrams — into a print-ready PDF. No mockups here: the PDF and preview beside this file were generated by running the real tool against this exact source.

Pipeline

Request flow

Supported inputs

Feature	Example	Notes
Headings	# Title	Full h1–h6 support
Mermaid diagrams	flowchart, sequence, gantt	Rendered via headless Chrome
Tables	this one	GFM tables
Code blocks	see below	Syntax highlighted via highlight.js

Code block

```
import { generatePdf } from "pdfify-md"

async function build() {
  await generatePdf(["sample.md"], {
    pdf_options: { format: "A4", printBackground: true },
  })
}
```
